

Day Glo Can

Fun and vibrant

Inks that are naturally bright and vibrant with or without UV light.

Why use this effect?

- Luminous and striking inks that radiate an intense reflection of color.
- Infuse your artwork by highlighting certain areas of your brand to draw in consumers.
- Inspire your audience to react to and engage with your brand.
- Delight consumers and create a positive state of mind.

Important things to know

- Day Glo inks can be applied to a variety of can sizes.
- Elements created using Day Glo ink should be placed in the main body of the can approximately 10mm below the neck line and 10mm above the base pressure line.
- We recommend you submit your design ideas to ensure the final artwork is feasible.*
- Qualification might be required.
- Compatible with cold-fill and pasteurization processes up to 82°C but not for retort.

Don't forget

- Lead Time: Standard lead time applies
- Minimum Order Quantity: Please contact your local sales representative

Available colors
