

Interactive Can

Connect with your consumers

Digital technologies like Quick Response (QR), Digimarc, Barcode, Snapchat and Shazam codes offer an exciting way to interact with consumers.

Why use this effect?

- Connect your can to virtual and augmented reality, websites or other media content such as product information, special offers, videos and more.
- Brands can capitalize on interactive engagement with consumers to support marketing opportunities.
- Allows for traceability and works to combat counterfeiting.
- Digimarc: The imperceptible code offers minimal interference with branding. The code is integrated within your design.

Important things to know

- For use with enabled mobile devices. Consumers can download a free QR code reader or most other apps (e.g. Snapchat, Digimarc) to their smart phone from any app store.
- Interactive Cans serve as either a trigger or pointer to your developed content.
- Codes work best with darker, solid colors. High contrast is recommended.
- Codes should be placed in the main body of the can.
- We recommend design ideas are submitted to ensure the final artwork is feasible.*
- Compatible with all filling processes including retort.
- Digimarc: You can select the areas of the can you want to enhance, though we recommend areas customers would naturally scan.

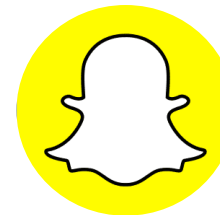

Don't forget

- Lead Time: Standard lead time applies
- Minimum Order Quantity: 1 million units
