

Matte Can

Pure sophistication

Matte over varnish produces a low sheen effect creating a striking on-shelf alternative to conventional gloss finish.

Why use this effect?

- Creates a natural or frosted 'just out of the fridge' look.
- Ideal for impact at point-of-purchase.
- Great for premium and modern appeal.
- Brands make a sophisticated appearance on shelf.
- More interaction with the packaging as the consumer feels the velvet-like surface.

Important things to know

- The matte effect is an overall effect meaning that all the colors on your design appear matte and with the same velvety softness.
- With reduced reflective properties, Matte OV is recommended for use with QR/AR applications.
- The matte effect is available on all can sizes.
- Compatible with cold-fill and pasteurization processes, but not for retort over 82°C.

Don't forget

- Lead Time: Standard lead time applies
- Minimum Order Quantity: 1 million units
