

Dynamark®

Dynamic packaging for better differentiation

Dynamark® variable print technology allows the mixing of multiple graphics onto a single pallet. Say more in one package with 8* different images or messages enabling promotional activity, limited editions and social engaging campaigns. (*8-24 images depending on plant)

Why use this effect?

Variety in packaging has numerous consumer engagement applications that can drive initial and repeat purchase.

- Offer a limited edition pack to draw attention to cans on the shelf or in the cooler.
- Create a collectable opportunity enhancing brand loyalty.
- Say more in one package with variable images or messages.
- Help drive social engagement campaigns with variable messages or hashtags.
- Add new ways for you to catch the customer's eye over and over again with a single customer purchase.

Important things to know

- Variable Dynamark Graphic window is integrated into the base artwork.
- One Dynamark element can consist of a maximum of two colors, one being the aluminum substrate, the other a selected ink which is part of your design already.*
- Dynamark Graphics can only be applied in the main body of the can.*
- Dynamark Graphics are available both in line drawings and HD images.*
- A design idea should be submitted at an early creative stage to ensure the idea is feasible on cans.*
- Compatible with all filling processes including retort.
- Available on all can sizes.

Don't forget

- Lead Time: 6 weeks from artwork approval
- Minimum Order Quantity: 1 million units

*We strongly recommend that before developing a Dynamark® design you check all our guidelines at printguides.ball.com
